THE TABLET OF LIFE. (Pilula At Longan Vitam.) The Scientific Discovery of the Age! The Magic Key to the Mystery of Life

The Magic Key to the Mystery of Life!

From time immemorial it has been man's predominating ambition to prolong Life. But among the many brilliant minds who have devoted their lives to the fascinating subject it was left to the immortal Darwin to give to the world, in his great theory of Life, the fundamental principle upon which to build all further research in this direction. Following closely in his footsteps came Prof. Dr. Ludwig Buechner, a German scientst of international renown, with his remarkable work entitled "Das Buch des Langen Lebens" (the book on Longevity). But alas, like Darwin, he too died ere he could reap the fruit of his wonderful doctrine. Others, however equally great took up the interrupted thread, with the result that two famous German scientists, after years of experiments and research, have at last discovered the secret of Longevity, in the shape of a remarkable Vegetable Compound, which, if properly used, will positively prolong Life. This new remedy, appropriately named "Longavita" (meaning Long Life) has been subjected to the most rigid tests at all the leading clinics and hospitals throughout Europe with marvelous results. Appreciating the importance of this discovery, we have acquired, at enormous cost, the exclusive proprietary right to this truly wonderful preparation, which has proved a blessing to mankind. "Longavita" is the true Tablet of Life, a rejuvenator par excellence, embodying the veritable secret of Longevity in a practical, feasible form. It is the fountain of perpetual youth, which it prolongs far beyond its present limits, while retaining health in a perfectly normal state. "Longavita" brightens the eye, stimulates mental activity, gives elasticity to the step, makes the face full, absorbs wrinkies, cleanses the system, purifies the skin, and is the only true Ponce de Leon remedy for old and young of both sexes. Endorsed by Europe's leading physicians.

The American people will never elevate to the presi-dential office a man, the logical effect of whose teachings would impair even in the smallest degree that mutual bond

Four years ago, almost this very night, we met in this hall under similar auspicies. The nation was in the midst of the mightiest political struggle that the young men of this generation had ever seen. It was then, for the first time, that the young men born since the war realized that the flower of patriotism springs not alone from bloody furrows. They saw the amazing sight of party ties snapped and patriots of all parties stand shoulder to shoulder of all parties stand shoulder to shoulder in a common cause. It was then fellow-citizens, that the common honesty of the nation was at stake. It was then that the American conscience was on trial before all the world! When the American people were plunged in finan cial depression, when the substantial farmers of the western prairies were ours tonight. The destiny of millions of souls of an alien race in the islands of the nation was at stake. It was then that the American conscience was on trial before all the world! When the American people were plunged in financial depression, when the substantial farmers of the western prairies were well nigh desperate by repeated failure of crops, when business enterprises of the east and middle west were tottering to their fall, then an old and repudiated financial theory was resurrected and reanimated largely by the energy and personality of one man, and lo, a subtle temptation was flaunted in the face of the American people! The wisest and the best, regardless of party ties, saw the grave exigency of that hour. Moved by the purest patriotism they strove to instruct their more humble brothers. The end justified their faith. The American people are so in their might and repudiated in the eyes of christendom!

THAT REPUBLICAN RALLY.

That Republican rally held in the Town hall on Thursday evening, the report of which we give in another column, was enjoyed by the audience present. Mr. Frank W. Allen, chairman of the town Republican committee, very happily introduced Representative Crosby as the presiding officer of the meeting, prefacing the introduction by a neat speech on the political outlook. The Hon. J. Howell Crosby on taking the chair spoke at some length on the unusual importance of the coming presidential election. Mr. Crosby gave hearty endorsement to President KcKinley's administration. Then followed the regular speakers of the evening-Senator Huntress of Somerville, Hon. Willard Howland of Chelsea and Hon. Samuel W. McCall of Winchester.

We have neither time nor space to write at length of this first and only Republican rally in Arlington. Senator Huntress spoke clearly and forcibly of the two great parties now in the field, each hoping to win. The senator made emphatic the necessity, as he viewed it, of the re-election of President McKinley. The Hon. Willard Howland made a tak ing speech. The Hon. Samuel W McCall, our representative in congress, the closest attention of his audience in his discussion of the able and wise administration of President McKinley The meeting was a thoroughly McKinley and Roosevelt gathering.

"CATCHING THE SUNSHINE."

We were made glad the other morn ing when a little girl not five years old said to ns as she was chasing in her room the earliest rays of the sunrise, "I am catching the sunshine." How delightful the saying! Appropriating to herself the brightest and best that God has to give. And all this is characteristic of the children. The little ones always see the silver lining of the cloud. They live in a world all sparkling and radiant with the light coming from above. They catch the sunshine, and why shouldn't we, their elders?

The bright little girl's happy saying gives us the headline of this editorial. Ve men and women engrossed in and made over-anxious by our multiplicity of duties oftentimes see no sun by day nor star by night. We too frequently get under the cloud in our continuous persistency to do things to our own liking. We for the most part are so intent in piling up material wealth that we let slip the immaterial. With our eyes constantly on the earth, we lose sight of the shining array of the heavens above. The whole world flooded with sunlight, and yet we catch not a single ray, because our gaze is so intent on something else. It is hardly less than a calamity to us that amidst such a prodigality of wealth literally heaped upon us by an all-generous giver, that we should so impoverish ourselves. It is bad enough to starve in a "far country" while feeding the swine, but it is infinitely worse to die of hunger in our father's house where there is bread enough and to spare.

"Just see," says a distinguished to gratify the sentiment of beauty in the mind of man!-the many-colored flowers of the green earth, and the many-colord stars of the cerulean sky; the tints of the living foliage of summer, and the more gorgeaus hues of the dying foliage of autumn-that season when nature weaves a mantle of more than Tyrian splendor, and spreads it like a garment over valley and hill; the fervid and ever-changing effulgence of the rising sun, and the gentler glorles of his setting hour." All these are ours if we will but take them into our heart of hearts and so appreciate them. "So many of us," as one has said, "eat and drink and work in a drab-colored universe instead of in this scene of ever-varying splendor."

We need the master to anoint our eyes that we may not only look up and "see trees as men walking," but that we may further have that clearer vision which takes in all the resplendent glories of God's universe. We wonder if all the men and women in Arlington are catching the sunshine, as do the children. It is better to walk by sight than by a weak and doubting faith. There isn't a man or woman throughout the length and breadth of our whole town who should not be made supremely happy by the sunshine all about on every side. It would be well with all of us if like the little girl we should catch on each early morning a ray of the sunshine. It would illuminate our pathway throughout the day, and give a silver lining to every passing cloud.

THE TEST OF FRIENDSHIP.

"The test of friendship," says Hamilton Wright Maybie, "is its fidelity when every charm of fortune and environment ful manifestations of this outward world them.

The measure of our friendship one for another is based too frequently upon soul to soul, and this response is never destroyed or lost, and yet the man or woman is left. To know our friends is a further in troduction of ourselves to ourselves, for in them we see ourselves reflected as plainly as we see the heavens above re flected in the depths of the waters beneath. In the real friend we trust We can hardly imagine a greater hell on earth than that which must come from a doubt of the sincerity of our supposed-to-be friend.

"A generous friendship no cold medium knows."

And again,

"Friendship! mysterious cement of the soul Sweetener of life!"

that "the test of friendship is its fidelity" in every and all conditions of life. Just suppose for a moment that all we men and women here in Arlington were such friends each to the other. Arlington, you may be sure, would then become still more distinguished than she is at present as a place of residence. Do not forget that men and women are the product of God's creation, aside and apart from all that goes to make up that which is simply material. "Honest men esteem and value nothing so much writer, "what a prodigality of creations in this world as a real friend. Such an one is as it were another self, to whom we impart our most secret thoughts."

NEVER IN A HURRY.

We notice that people 'way up here in the country are never in a hurry. Everybody has time enough and a little to spare. And, pray, why shouldn't they have? The world was not made in a day. Nature never is in haste. Just see how the seasons come and go. The summer never pushes the autumn to the wall in any impatient way to lose itself in the golden days of September or in the more genial rays of the October sun. The summer months always take their time to complete their cycle, and so it is with the autumn-it never hastens to overtake the cold of winter. And the same is true of all nature. There is no save with the human kind in our metropolitan centres and their immedate suburbs. Here, nearly two hundred miles away from Arlington, where we are writing this editorial, no one is on the run. In this peaceful and attracout any fuss or worry. Here things go on pretty much as God intended they should. "FIVE MINUTES FOR REFRESHMENTS,"

The above is the familiar shout at regularly appointed eating-stations all along our lines of railroad. Just think of it! To eat, or rather bolt down, a meal in five minutes, all the while fearing that the train may whistle "all aboard" and be off with you "left." Is it any wonder that we are a nation of dyspeptics? This railroad "five minutes for refreshments" is only a fair sample of how the American people shovel in their food. As a people, we are lacking table manners, for an average decency would insist upon a reasonable amount of time being had in partaking of our three regular meals a day.

The English people far better understand the philosophy of life than we do. They can afford to take an hour or more at each meal, and then have ample time to do their work. But these "railroad refreshments" are what we are particularly interested in just at present. It was only the other evening, while midway on a long journey by rail, that we attempted to respond to the exclamatory shout of "five minutes for refreshments," for we were nearly starving to death. But on making our exit from the rear car where we were comfortably seated, we found we had to walk up past the entire train of 14 passenger cars before reaching the lunch counter. Just as we had called for our coffee the warning two-minute bell rang, and by the time we had swallowed our stimulating beverage in dyspectic haste the cars were starting, so we had to run for dear life to resume our seat.

Why will not our railroad authorities do away with the lunch counter, or otherwise give a reasonable time for one to somewhat appease his appetite? The biggest kind of a swindle is now being perpetrated on the public by our railroad eating restaurants.

ONE HUNDRED DOLLARS ALL TOLD.

This question of a mere livelihood oftentimes takes to itself that persistently anxious thought that does not belong to it. We all of us have a few simple wants that must be supplied, hurry manifested in all this wide world but beyond this fundamental necessity our wants are all relative, and as a matter of fact do not exist. It isn't necessary, for instance, that a woman should have a new hat every three months, neither is it necessary that a man should spend his last dollar in trytive country the days are long enough ing to keep up with the latest style in in which to do one's allotted work with. the line of trousers and coat. > at the left of the main room is sufficiently ample for its purposes. There is a similar sacristy in the basement.

The gothic architecture of the exterior of the building makes an imposing showing. The walls are of pressed

mings of buff sandstone. The roof is covered with Monson slate, with copper gutters and trimmings. The peaks of the front and rear gables are surmounted

by copper crosses. The lighting will be by electricity. Especial care has been given to the heating and ventilation of the church.

One of the many attractions of the main audience room is the large altar. Its design is the outcome of the highest art. Its material is the best American statuary marble, while the shafts of the columns are Mexican onyx. The mensa is a single slab of marble, 11 feet long and 2 feet 6 inches wide, on which appear the five crosses representing the five wounds of our Lord, and the usual reliquary.

Everything in and about St. Agnes' church remodelled is of unique design. The exercises at the consecration of the altar on Thursday morning were as follows:

The services, occurring at 7.30 a. m., were conducted by the Rt. Rev. John Brady, assistant bishop of Boston, together with the Rev. A. J. Fitzgerald and the Rev. A. S. Malone of St. Malachy's church.

The bishop was robed in amice, alb, cincture, stole and purple colors, wearing the miter and bearing the croizer in his left hand. While vested in this manner, with assistant priests, he ap. proached the altar. Laying aside the croizer and miter, he recited the antiphons, the assistant priest reciting the responses. Afterward the bishop knelt at the altar while the assistant priests recited the litanies. The name of the saint in whose honor the altar was consecrated was repeated twice in the prayer that followed. Then the bishop made the sign of the cross three times over each of the altars, reciting the prayers of consecration. The bishop then blessed the salt, the ashes and the wine, and, approaching the altar, made the sign of the cross in the middle of the altar table, with holy water, repeating this at the four corners of the altar. With holy water the bishop prepared the cement with which the coverings of the sepulchre were to be sealed. The relics were carried to the altar, placed with lighted tapers on the tables, and CALL IN AT the sign of the cross made over the sepulchre, in which the relics were then placed. The bishop, with the assisting clergymen, then covered the table of the altar with linen, The four corners and middle of the table was anointed. The incense to be poured on the table of the altar was blessed, after which the bishop recited the preface and anointed the front and the four corners of the altar, followed by the sprinkling with holy water of the aitar linens and orna-

ments and cross of the altar. This elaborate ceremony was followed by the celebration of the mass.

> Correspondence. White Face "Glen", N. H., Oct. 21, 1900.

Dear Enterprise: There is nothing more delightful than to return frequently to an old home that has given you a welcome so full of heart and soul as has Mountainside cottage given us during the summer that has now merged itself into the golden autumn time. It was on Saturday morning that under the clearest of skies and in the light of a most genial October sun we started from Arlington for a Frankin Russell and Mrs. T. Ralph brief visit to these grand old mountains and to this wonderfully picturesque valley of which we told you so fully, Offices dear Enterprise, while the summer months were on. Our journey all the way along on Saturday to these glorious heights was made under the most inspiring conditions. The earth joyously answered back to the smiling heavens. of St. Malachy's church, for then the in its sea of most delicate tint and color. Nature had blazed all our way from Arlington to White Face. Our entire conversation as we steamed along by the Boston & Maine railroad was punctuated with exclamation points. tive and intense. Now, dear reader of this communication, just imagine yourself on this brightest and best of Sundays surrounded by a whole world of varied tint and color! Who, under such conditions and with so marvellous a revelation made him of nature's great heart and soul, would not exclaim that 'God is in his holy temple?" There is no greater miracle recorded in all sacred history than that of the passing of the seasons. Just think of it! With the dying of the fragrant and leafy summer time there comes to each of us the fuller and richer life of the antumn time. God in his wealth of giving never takes anything from us that he does not at once put in its place something better. Well, here we are for a day or two

with Black Mountain, and Young Moun-

tain and Flat Mountain in immediate neighborhood, and with the Ossipee range greeting our vision, and this faraway valley stretching itself to the Pine Tree State, so that we are renewing our vows of a deep and growing love to this world of enchantment all about us. No one can come here at this season of the year without receiving a fresh baptism in the name of all that is good and holy. Those of you who may have read 'In the forest of Arden," by Hamilton Wright Maybie, have essentially found therein the description of this paradise of God's own make. And yet, even Maybie's wonderfully descriptive pen cannot reveal all the charms of such a nook and corner as one finds here among these delectable mountains. To this northern country are brought all the gifts of the gods. During these autumn months all nature pays tribute The morning service at the Follen to this stupendous creation of the inall that is best in heart and soul. No mountains without coming into fuller and nearer relationship with omniscience and omnipotence. Through these mountain approaches one comes to exclaim that "before the mountains were brought forth or ever thou hadst formed the earth and the world, even from everlasting to everlasting, thou art God.' Whenever we put our children in touch with this world of ever varying splendor. then do we bring them near to the great teacher that they will honor and glorify all manhood and womanhood. To listen to the great heart beats of nature is to take on a newer and a diviner life. The loving and appreciative companionship of this outward world of ours is an introduction that leads straight to God.

We wish it were possible for every-body in Arlington and elsewhere to an nually visit these mountains. Here is found the "schoolmaster abroad." the lessons set are in keeping with that higher education which affords a key to all mysteries.

THE WRONG MAN.

BY CHARLES B. LEWIS.

I was at Stockholm simply as a tourist and sightseer, and I was all alone. I had no idea of meeting any one I knew, and a surprise awaited me on the first night of my arrival when a man whom I clearly saw was a Polander edged along up to me on the veranda of the hotel as I smoked my cigar and said:

'You are discretion itself, Mr. Grelling. You have registered under another name. How were matters in London when you left?"

"I don't exactly understand you," I replied as I looked him over and made sure that we had never met before.

"I admire your caution," he said with a laugh, "but you need have no fear of me. You see I have my credentials."

He took a card from his pocket on which was inscribed three capital letters of the Greek language with a cu-

THE WAITER WHISPERED IN MY EAR. rious scrawl beneath, and as I looked without being able to make head or tail of the thing he whispered:

"The others will be here inside of two days, and we will have a meeting. I have been here three days, and I find nothing to alarm me. I trust matters in London are all right?"

"As far as I know," I replied as I returned his card and wondered whether he was trying to cheek me or had real ly mistaken me for somebody else.

"Good. We can settle all the details in an hour after the others get here. It will be as well that we are not seen together, but I will notify you when we

are ready.' When he had gone, I made up my mind that he had mistaken me for an other man, but I could not quite catch on to his expressions. He was evident ly in Stockholm by appointment, and others were to arrive later, and a Mr. Grelling, who was probably an Englishman, was mixed up in the affair, if not the leader. The matter puzzled and annoyed me for half an hour, and then I dismissed it from my mind. Three hours later, as I retired to my room, the stolid faced and wooden headed waiter who carried my light hung about in a queer way after setting the candle down, and I finally

"I wish to warn you. Strange men have been here for a week. I think they are waiting for you."

gave him a small coin and waved him

out. Instead of going he whispered to

"But who can be looking for me?" I queried in reply.

"You know best. Good night and God save you. I will keep my eyes and ears open for you."

I wanted to question the man, but he hurried away and left me more befogged than before. I spent an hour trying to figure out some satisfactory conclusion and then fell asleep. Next morning at breakfast the same man waited on me. I had a little table by myself, and while bringing my dishes the waiter whispered in my ear:

"The two strange men are at the fourth table. I am sure they are Russian spies and will watch you."

Now I had the key to the mystery.

There was some sort of a conspiracy on foot, probably against the peace of the czar, and the conspirators were to meet at Stockholm. From what I had read and heard of such affairs the plans and plots generally originated in England or Switzerland, but these men had selected nearer ground. Their plot must have been suspected, or the Russian spies would not have been there. Yes, the two men were Russians, and though their idea seemed to be to pass for merchants they made a poor showing at it. I don't pretend to say that a spy can always be spotted offhand, but do assert that after one of them has followed the occupation for several years there are many ways in which he betrays his calling to an observing eye. They cast many furtive glances in my direction, and when I realized that I was to be under espionage I felt a spirit of deviltry take possession of me. I would carry off the role of conspirator with brazen cheek. For the next two days I was closely shadowed. Whenever I wandered about the town,

one of the two men followed me. No

doubt it was noted down whom I ad-

dressed, when I took my meals, how

many cigars I smoked and all other lit-

tle details. After the first day of this

spy business the same stolid facea waiter slipped into-my room with pale face and whisperingly exclaimed:

"Those spies are following you everywhere. For God's sake be careful. Ah, i.e. but who could have put them on the scent!"

"See nere, Hans," I said as I put my hand on his shoulder, "you are evidently on the inside of this affair, and I wish you would tell me what in the devil it all means. Has your gang planned to rob a bank, steal a steamboat or upset the Russian government? I don't like to go it blind this way."

He looked at me open mouthed for half a minute, and then a broad grin stole over his face. He thought I was playing off on him to test his prudence and loyalty.

"You will carry it through all right," he finally said with many heavy nods of his head, and he went away looking very well pleased.

At the end of another 24 hours I got

a further insight into the mystery. I had strolled into another hotel three or four blocks away to examine the register, as a globe trotter invariably does for no reason he can explain, when a traveler entered who might have been my twin brother as far as outward appearances went. He was of my height and weight, had the same colored eyes, hair and mustache, and I believe our own mothers would have wondered which was which. He stared at me, and I stared back, and I wandered back to my own hotel, knowing that the real man from London had arrived. An hour later the Pole came to me in a great funk. He had confused the two of us, as well he might, and given his little affair away to a stranger. He started out to say something, but I stopped him with:

"I have seen your chief and know how the mistake came about. Nothing you said to me will go farther. What you are up to I don't know and don't want to know, but don't mix me up in it. Good day.'

He mumbled blessings on my head and disappeared to be seen no more, nor did the twin brother call on me or send me any word. My waiter was also knocked out when he discovered that a mistake had been made, but a few words quieted him. The Russian spies must have had a bad time of it trying to settle on the right man, but they finally decided in my favor. The Englishman was free from surveillance, while I was dogged closer than

At the end of a week and while they were still dogging me, and I was rather enjoying it, there was a fire aboard of a ship in the harbor. It was about 9 o'clock at night, and a great crowd gathered on the wharfs to watch the conflagration. I made one of the number, and in my anxiety to secure a good view I mounted the bows of a smart looking brig lying at a wharf. I was hardly over the rail before two men followed and seized me and hustled me down into the cabin. They were the Russians who had been spying on me. Of course I made every form of protest, but I was run into a stateroom and locked up, and within an hour the brig was out of the harbor. It seemed as if she had simply been waiting my arrival on board. We had been under way a couple of hours when my door was opened, and I was ordered to step out. I found the captain of the brig, the two spies and a Russian government official awaiting me.

I have told you that the Englishman and I looked to be twins, but I had not had time to look for little details sat down opposite the Russian official he began comparing my description and appearance with a written description, and at the end of five minutes he rose up and thundered at the two spies:

"Dolts! Idiots! Blunderers! You have arrested the wrong man! This is not the Englishman!"

There was a row to beat the band for the next ten minutes. The spies protested that I answered the description given them and had carried off the character in all ways, and the official

shouted at them: "Has he a mole on his chin? Does his left eyelid droop a little? Is there a scar on his right hand thumb? Oh. you blunderers and incompetents, but you will be rewarded for this!"

"If not too much trouble." I said to the official as he got through storming, "will you kindly explain why an American citizen has been made prisoner in this fashion? Of what am I guilty? If guilty of anything, by what authority do you take the law in your own hands?"

I was told that it was a mistake, but got no other satisfaction. The brig was put about, but as the wind fell we did not make the harbor until after daylight. Then I was dumped on the wharf without apology. I walked straight to the American consul and told him the story, and his reply was:

"Why, man, you had best thank your stars instead of looking for an apology. When the Russian officials get hold of the wrong man by mistake, he is generally sent to Siberia to cover up the

Later on 1 found that the Englishman and his party left Stockholm the same evening, but where they went and what sort of a conspiracy they had on hand I never ascertained.

Her Love Songs. The "Sonnets of the Portuguese," which were written by Elizabeth Barrett Browning, were never intended for publication, but when she showed them to Mr. Browning, whom she had married after they were written, he realized the fact that in them was sung the most perfect love song the world had ever heard, and he concluded such poems should not be hidden. Mrs. Browning was unwilling to publish them in her own name, and as he was fond of calling her his "Little Portuguese" it was decided to have them appear under this name. They are Petrachian in form and among the most beautiful of the language.
